

**Amendments to the Claims:**

This listing of claims will replace all prior versions, and listings, of claims in the application:

**Listing of Claims:**

Claim 1 (currently amended): An integral circuit protection device providing overcurrent and overvoltage protection for a circuit and configured to be connected to the circuit, comprising:

an overcurrent protection portion;

an overvoltage protection portion having an at least partially conductive surface; and

a plurality of terminals for connecting both the overvoltage and overcurrent protection portions of the integral circuit protection device to the circuit to be protected, wherein the at least partially conductive surface of the overvoltage protection portion serves as one of the plurality of terminals, wherein the circuit protection device is formed as a discrete component for mounting on a printed circuit board, and wherein the plurality of terminals contact a surface of the printed circuit board upon placement thereon.

Claim 2 (original): The integral circuit protection device of claim 1, wherein the plurality of terminals includes first, second and third terminals, the part of the overvoltage protection portion serving as one of the plurality of terminals being the third terminal, the overcurrent protection portion being electrically connected between the first and second terminals, and the overvoltage protection portion being connected to the second terminal.

Claim 3 (original): The integral circuit protection device of claim 1, wherein the overcurrent protection portion includes a fuse.

Claim 4 (original): The integral circuit protection device of claim 1, wherein the overvoltage protection portion includes a bi-directional thyristor.
